Summary_

Aspiring Python Developer currently studying Full Stack Development, with strong fundamentals in **Python programming** and **SQL**. Skilled in writing clean, efficient code, solving logical problems, and working with databases. Actively learning backend development concepts and improving problem-solving and communication skills to contribute effectively in a professional IT environment.

COURSES

nov 2025 – feb 2026

Besant Technologies python Full Stack and Web Developer Intern

- Built a dynamic website using HTML, CSS, JavaScript, and MySQL.
- Used JavaScript for form validation and simple interactivity, and integrated frontend with backend APIs.
- Designed and optimized MySQL databases, writing efficient SQL queries with joins, subqueries, and constraints.
- Gained hands-on experience in object-oriented programming, real-time project development, and database management.

PROJECTS

Driver Drowsiness Detection System: Built a real-time computer vision system using Python and OpenCV to detect driver fatigue through facial and eye analysis. Applied Haar Cascade, HOG, and ML models to classify alert vs drowsy states with 92.5% accuracy and trigger safety alerts.

[project link](#)

AI-Based Fire Detection System: Built a Python & OpenCV-based fire and smoke detection application using TensorFlow/CNN with a Streamlit UI to process live camera/video and highlight fire regions in real-time. Developed an AI-powered fire detection system capable of identifying fire and smoke in images and live camera feeds using computer vision and deep learning techniques. The application provides real-time detection with a user-friendly interface, enhancing early hazard recognition for safety monitoring applications.

Library Management System: SQL | Relational Database Design and implemented a relational database for managing books, members, and borrowing records. Created tables with Primary Keys and Foreign Keys to maintain referential integrity. Performed CRUD operations (INSERT, UPDATE, DELETE, SELECT). Applied filtering using WHERE, BETWEEN, IN, LIKE, AND/OR operators. Used Aggregate Functions (COUNT, SUM, AVG, MAX, MIN) for data analysis. Implemented GROUP BY and ORDER BY for reporting and sorting. Managed book pricing updates and borrowing fine tracking. Demonstrated practical knowledge of database constraints and relational modeling.

Technical skills

Programming Languages -Java,python

Front-End Technologies -Html, CSS, JavaScript

Database – MySQL

Tools&Platforms : VS Code, IDLE, GitHub, MySQL

EDUCATION

Bachelor of Science (BSc) – Information Technology

Hindusthan College of Science and Commerce, Perundurai

(2026) CGPA: 6.3

(2023) HSC: 75.0 SSLC

(2019): 100

CERTIFICATIONS

Python Full Stack Development Besant Technologies | jan - march 2025

Git & GitHub – Coursera / Udemy Applied

Machine Learning in Python – Coursera AI

Foundations – Infosys Springboard
